REACT JS DEVELOPER
ReactJS | NodeJS | JavaScript |TypeScript| HTML5 | CSS | Bootstrap

PROFESSIONAL SUMMARY

- **3.2 years** of work experience as a **UI Developer.**
- Developed reusable components using React JS library for the user interface.
- Good Knowledge in **HTML, CSS, Bootstrap, Redux Toolkit**, and other JavaScript libraries like Material UI, Formik, Yup, Axios, React-Query etc and version controls like Git, GitHub and BitBucket
- Exposed in working with latest **React Hooks Functional Programming**.
- I possess professional experience in developing APIs using Node.js and Express, demonstrating proficiency in building scalable and efficient server-side applications.
- Involved in requirement Analysis, Design and Development.
- Strong hands-on experience with Forms, data tables and Lazy Loading.
- Integrated Redux store management to drill-down API response throughout all the reusable components.
- I have utilized the promise-based **HTTP client Axios** and the Fetch API to interact with and retrieve resources from various APIs.
- I have hands-on experience in mitigating side effects generated by the Redux-Thunk middleware, which is the conventional approach for handling asynchronous operations.
- Involved in requirement analysis, design and development.
- Experience in Using GIT for code repository and as version control mechanism.
- Strong debugging skills using the browser.
- I am well-versed in Agile methodologies, having applied them in my professional projects, and I possess practical experience utilizing Jira and Confluence for efficient project management and collaboration.
- Ability to be creative and take self-initiatives to manage multiple projects in parallel during critical situations.
- Ability to work independently and with a team.

SKILL MATRIX

Languages	JavaScript
Web Technologies	HTML5, CSS, Bootstrap,DOM manipulation
IDEs	Visual Studio Code
Frameworks	React, Redux-middleware, REdux-forms
Platform	React Js, RESTful web services
Programming Languages	JavaScript, Node.Js, Typescript
Operating System	Windows
Tools	Visual Studio Code, Git, GitHub, Bitbucket

EDUCATION

- BTech, CSE, Sri Vasavi Engineering College, Tadepalligudem, India   June 2016 to May 2020

WORK EXPERIENCE

Software Engineer	**Cashapona Technologies Pvt Ltd**	**Nov 2021-Dec 2023**

Project Name   **:** PDS Galaxy
Designation   **:** Software Engineer
Tools/Technologies   **:** React, Redux- middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful Web Services.DOM manipulation

Roles & Responsibilities:

- Developed a web application featuring modules such as Data **Repository, Role Management, User Management, Core Windows, and Custom Windows.**
- Integrated **REST APIs** based on business requirements, utilizing **Redux Toolkit** and context for maintaining the global state of the application.
- Incorporated user-defined forms using **reusable React components**.
- Implemented a dynamic form allowing users to specify form fields and validations, including data type, min and max length, and email validations.
- Integrated a feature enabling users to select favorite windows for quick access upon logging in.
- Implemented role-based authentication and authorization, enabling users to View, Update, Add, and delete windows (forms) based on granted permissions, and provided support for an existing website.
- Introduced new payment flows and integrated reusable components to enhance functionality and enrich the user experience.
- Utilized Restful web service calls for **POST, PUT, DELETE, and GET** methods.

Project Name   **:** MY COVERAGE CARE
Desgination   **:** Software Engineer
Tools/Technologies   **:** React, Node.js Redux- middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS, Visual Studio Code, Restful WebServices.DOM manipulation

Roles & Responsibilities:

- Integrated REST APIs as per the business requirement. Used Redux tool kit and context for maintaining global state of the application.
- Integrated User defined forms using reusable React components.
- Developed the forms and worked on the Validations, functionality and Worked on the PA-Login page, Routes.

Project Name   **:** NCUK
Designation   **:** Software Engineer
Tools/Technologies   **:** React, Redux- middleware, Redux-forms,Node JS, TypeScript,React- Query,Google Cloud, AWS, Visual Studio Code, RestfulWeb Services.DOM manipulation

Roles & Responsibilities:

- Create, build, and validate HTML5, CSS3, Bootstrap, JavaScript, and React.JS components adhering to accessibility guidelines and web browser standards to ensure a compliant and user-friendly website.
- Implemented React-Router to transform the application into a Single Page Application (SPA).
- Worked in using React JS components, Forms, Events, Keys, Router and Redux concept.
- Used Restful web service calls for POST, PUT, DELETE and GET methods.

Project Name   : Wellfund
Designation   : Software Engineer
Tools/Technologies   : React Js, Graphql, Visual Studio Code
Roles & Responsibilities:

- Design, develop and test HTML5, CSS3, Bootstrap, JavaScript, and React.JS.
- Worked in using React JS components, Forms, Events, Keys, Router and Redux concept.
- Implemented Restful web service calls for POST, PUT, DELETE and GET methods.

Project Name   : CAMPIGN MANEGER
Designation   : Software Engineer
Tools/Technologies   : React, Redux- middleware, Redux-forms, Node JS, Google Cloud, AWS,
                            Visual Studio Code, Restful Web Services.
Roles & Responsibilities:

- Worked on Developing a web application to view the following modules: Campaign Maintenance, Template maintenance.
- Integrated **REST APIs** as per the requirement. Used **Redux tool kit** and context for maintaining global state of the application.
- Integrated User defined forms using reusable React components.
- Integrated dynamic form where user can provide the form fields and validations and Integrated re-usable components.

Software Engineer   **Necorp Systems Pvt Ltd**   **Sept 2020-Sept 2021**
Project Name   :ROOTVINN
Designation   : Software Engineer
Tools/Technologies   : React, Redux- middleware, Redux-forms, Node JS, Spring-boot, Google Cloud, AWS,
                            Visual Studio Code, Restful Web Services.
Roles & Responsibilities:

- Developed and maintained website that allows user to register into application to create profiles, upload photos and video and keep in touch with friends, family and colleagues.
- Implemented React-Router to transform the application into a **Single Page Application** (SPA).
- Integrated User defined forms using **reusable React components**.
- Implemented unit and integration tests to ensure the reliability and robustness of the application functionality and enriching the user experience.
